SUMMARY

Dedicated Operational Architect and software developer with a six-year background in building custom digital solutions for local businesses and high-level professionals. I bridge the gap between complex back-end infrastructure and high-touch human services — balancing technical precision with a trauma-informed perspective to deliver bespoke digital systems that prioritize efficiency, stability, and growth. Earned an IT Specialist certification at Francis Tuttle Technology Center and ranked 2nd in Oklahoma for C# Programming. Currently providing tailored web architecture under independent contract while pursuing dual degrees in Psychology and Crime Victim Advocacy at OSU-OKC.

CORE COMPETENCIES

Systems & Dev	Systems Engineering · Process Automation · UI/UX Strategy · Technical Documentation · Crisis Management
Technical Stack	Linux (System Admin / Bash) · HTML5 / CSS3 · SQL · C# · Git · Adobe Creative Suite · Toast POS · Shopify
Human Services	Trauma-Informed Care · Crisis Intervention · Healthcare Administration · Clinical Support · Operational Efficiency

EXPERIENCE

Operational Architect & Software Developer

January 2023 — Present

Independent Contractor

- Architected and deployed custom, high-performance web ecosystems for local enterprises, significantly reducing administrative overhead and increasing digital conversion rates.
- Leveraged data-driven UI/UX design to enhance customer engagement, consistently increasing digital reach through optimized, SEO-friendly, and mobile-responsive architecture.
- Manage the full development lifecycle from initial design in Adobe Suite to technical implementation, 24/7 emergency support, and weekly system audits under recurring service contracts.
- Deliver bespoke digital infrastructure prioritizing speed, security, and zero-downtime operational uptime for client businesses.

Front of House Specialist & Expo

November 2023 — July 2025

Waffle Champion

- Served as on-site Technical Lead for POS stability, resolving critical system bottlenecks in high-volume environments to ensure zero-downtime service.
- Mastered the Toast POS interface for high-volume digital systems management and precise financial data entry.
- Maintained operational uptime by troubleshooting hardware and software issues under pressure.
- Acted as a central communication hub between back-end production and front-end delivery to ensure seamless workflow.

EDUCATION
